

Fact Sheet

Improve the accuracy of your pharmacy claim payments

Currently, **10% of members nationwide** with commercial coverage and **15% of people enrolled in Medicare Advantage** plans have overlapping pharmacy coverage. Given the high cost of drugs, an effective pharmacy coordination of benefits program can yield substantial savings.

What DataSpring COB will do for you

- Increase identification of new secondary COB coverage
- Improve payment accuracy
- Reduce costs from member canvassing, claim reprocessing, data validation and recovery
- Automate manual processes-Improve provider and member satisfaction by expediting eligibility and claims processes

How it works

DataSpring leverages a continuously updated registry of coverage data on over 225 million members to enable plans to coordinate benefits before claims are paid, reducing errors and increasing cost avoidance.

- Offers the only national commercial and state database for member eligibility data updated weekly
- Pharmacy-to-pharmacy overlaps validated
- New coverage overlaps delivered to you every Monday
- Member Data Portal portal facilitates member research, plan-to-plan inquiries and tracking for faster COB resolution
