

The Data That Powers Healthcare

DataSpring powers healthcare with accurate, authorized data directly from clinicians and health plans. Built on the most complete U.S. healthcare data foundation, we combine industry-shaping solutions and deep expertise to help the industry operate more efficiently and deliver better experiences and outcomes for providers, payers, policymakers, and patients.

Provider Data

The CAQH Provider Data Portal serves as the industry's front door and central repository of provider-sourced data.

About 80% of U.S. MDs, DOs, and DMDs share their data and power **4.8 million** records nationwide.

 **>90%**
accuracy for practice

 **100%**
compliance with the No Surprises Act (NSA)

Member Data

The CAQH Member Data solution revolutionizes payment integrity by managing **225 million** health plan member eligibility records that represent **75%** of all covered U.S. lives.

 **14:1**
average ROI

 **100%**
cost avoidance for up to 90% of overlaps

Provider Data Portfolio

Provider Data Portal: More than **2.5 million** providers actively enter and verify their information. With a single credentialing application — accepted or supported in all 50 states — DataSpring eliminates redundant processes, improves data accuracy, and streamlines network management for health plans.

Provider Directory Management: By continuously collecting and confirming provider data, with over **1.8 million** attested profiles, health plans get verified, up-to-date data to help members find the right care faster, with less work.

Primary Source Verification: DataSpring uses **500+** trusted sources to validate provider credentialing data with **98% accuracy** to reduce onboarding delays and ensure the safety of provider networks.

Sanctions Monitoring: DataSpring monitors over **1,800 sources** to detect disciplinary actions. Our solution flags sanctioned providers with **98% accuracy** across all participating health plan rosters to automate manual processes and strengthen compliance.

Data-as-a-Service: Access enriched provider data, featuring **900+ elements** per profile, to drive better analytics, insights, and strategy. Our custom data solutions transform operations across organizations' specific needs and use cases.

Member Data Portfolio

Coordination of Benefits: DataSpring matches member files from participating health plans against a continuously updated registry that covers over **225 million** lives. Our solution identifies overlapping coverage with **99% accuracy** to improve payment integrity and eliminate costly recovery efforts.

COB On-Demand: Compare custom datasets against our **225 million+** covered lives for additional cost avoidance and recovery opportunities.

Solution Consulting: Partner with DataSpring experts to advance strategic goals, optimize workflows, and identify efficiencies that reduce costs and enhance revenues.
